

CAPABILITY STATEMENT

COMPANY OVERVIEW

Municipal Risk & Safety Consulting provides practical advisory support to municipal utility districts, special districts, and other public-sector entities seeking to reduce risk, strengthen operational readiness, improve infrastructure protection, and support informed decision-making.

The firm helps clients identify vulnerabilities, protect public assets and infrastructure, strengthen resilience, and make sound, defensible decisions that support continuity and public trust.

CORE SERVICES

- Infrastructure Risk & Safety Assessments
- Water & Wastewater Security Audit & Resilience Support
- Law Enforcement Advisory & Coordination Services
- Operational & Governance Risk Guidance
- Information Technology & Cybersecurity Risk Advisory
- Public Asset Protection & Incident Prevention Planning

SPECIALIZED SUPPORT

- Crime Trend & Incident Analysis
- Parks, Trails & District Land Safety Assessments
- GIS & Critical Infrastructure Coordination
- Drone / UAS Infrastructure Documentation
- Board & Staff Safety Awareness Training

LEADERSHIP

Sean Feldmann, Founder

Sean Feldmann founded Municipal Risk & Safety Consulting to help public entities address real-world safety, risk, and operational challenges with practical guidance grounded in direct public-service experience. He began his public-service career in 2014 as a public safety and 911 dispatcher and continued that path in 2016 as a deputy sheriff. After relocating to Central Texas in 2018, he continued serving in law enforcement while expanding his work in and around the special utility district environment. His background includes public safety programs, grant-supported initiatives, operational improvement, law enforcement technology, district-level concerns, and leadership and supervisory training, including coursework through the FBI Law Enforcement Executive Development Association. In 2024, he was elected to a municipal utility district board of directors, first serving as Assistant Secretary and later as Board President.

TARGET CLIENTS

- Municipal Utility Districts
- Special Utility Districts
- Water and Wastewater Districts
- Emergency Services Districts
- Planning, Developing, and Operational Districts
- Local Governments and Other Public Entities

WHY MRSC

- Public-sector informed approach
- Practical, not theoretical guidance
- Board-level and field-informed perspective
- Infrastructure, security, governance, and technology awareness
- Tailored consulting based on entity size, facilities, and operational needs

ENGAGEMENT APPROACH

Consulting engagements are tailored to the entity and may depend on factors such as acreage, facilities owned, water or wastewater infrastructure, parks and recreation assets, population or household connections, road powers, and the nature of the concerns being evaluated.
